First lecture: 15.10.2019

Description:

The lecture ‘Econometrics’ is a compulsory module during the first semester of the Master in Economics program. The lecture provides an up-to-date introduction to econometric methods for the analysis of cross-section and panel data. The lecture will be accompanied by methodological and empirical exercise sessions.

A three day preparatory course on statistics/econometrics will be offered before the beginning of the term. The course covers basic concepts of statistics and probability theory as well as matrix algebra.

Content:

1. The Linear Regression Model
2. Instrumental Variables Regression
3. Models for Panel Data
4. Experiments and Quasi-Experiments
5. Microeconometrics
6. Carrying Out an Empirical Project

Course language: English

Transcript of records:

Your grade for this course will be determined in a final exam but you can earn extra credit by completing homework assignments.
